Gross performance before impact of fees, taxes and charges. Past performance no predictor of future returns

During the quarter, the portfolio saw mixed returns: Berkshire Hathaway (NYSE: BRK.A) posted -1.7% and Flagship Investments (ASX: FSI) increased by 2.9%. Our UK portfolio continued to perform well, posting +3.9% over the quarter (in local currency), meaning the active UK portfolio has delivered +17.1% above the FTSE since inception. The investment in the Global Positive Peace Growth Fund (unlisted) is performing very well, with the fund posting 29.7% for the year, and continues GFL's strategic direction of shifting toward a more active investment approach.

ECONOMIC COMMENTARY

This quarter's performance differed between markets, with the US seeing record highs, while China was hit with sweeping regulatory action and concerns relating to their property market. Globally, many economies shifted from recovery to steady expansion, with positive corporate commentary, solid economic activity, and continued supportive fiscal policy. However, some slowdowns did occur due to the Covid-19 Delta variant. Governments appear to be shifting from damage control procedures toward the endgame of a post-Covid world, which is aimed at vaccination programs and removing social distancing practices – an approach led by the US and the UK, with early indications of an acceleration of growth and economic outperformance.

The US economy appears to be entering an expansionary phase, after a year of recovery from the pandemic. Consumer spending, housing and developments, and labour markets have been particularly strong, with early signs this growth is slowing to a steadier and more reasonable pace. The US Federal Reserve appeared to have a dovish stance to further tightening of policy and with a slowdown in asset purchases, rate projections are expected to hike at a faster rate. In the US, equities were muted over the quarter with strong corporate earnings driving performance in August, while inflationary and economic growth concerns placing pressure on markets by quarter-end. The S&P500 posted +0.2% while the Nasdaq posted -0.4%, by quarter-end.

In Europe, the recent Delta variant seemed to have less of an impact since many of the larger eurozone countries are over 75% fully vaccinated – many travel restrictions and other measures are largely lifted. Similarly, inflationary issues driven by rising energy prices and supply chain bottlenecks were the key issues plaguing markets. In the UK, the Bank of England (BoE) took a more hawkish tone as inflationary pressures continued to surpass expectations. Across Europe natural gas shortages, lack of wind, and fuel shortages presented key issues for investors. The FTSE posted +0.7%, the CAC +0.2%, the DAX was -1.7% and the Euro Stoxx was -0.4%.

In Australia, the housing market has proven to be remarkably resilient in spite of Covid restrictions limiting activity. Residential building approvals posted +6.8% in August, while price gains have been +18.3% over the year. Labour markets remained strong despite the severe restrictions in place across the country with unemployment steady at 4.5%. The ASX All Ordinaries posted +0.6% for the quarter, ASX 200 +0.3%, the MidCap 50 +3.0% and the Small Ordinaries was +2.6%, respectively. The AUD depreciated during the quarter, posting -3.6% against the US Dollar (72.3 US cents), -1.0% against the Pound (53.7 pence), and -1.3% against the Euro (62.4 cents).

PORTFOLIO CHARACTERISTICS (as at 30 September 2021)

NTA (before tax on unrealised gains) – total	\$33,063,356
NTA (before tax on unrealised gains) – per share	308.3 cents
